Irfan Sharif

irfansharif.io — irfan@irfansharif.io — in/irfansharifm — github.com/irfansharif

Skills

· Experience with distributed systems, storage engines, and systems architecture
· Go, Haskell, Ruby, C/C++, Python with working knowledge of Git, Redis, Docker, and NGINX

Work Experience

Cockroach Labs, Inc. Aug – Dec, 2016
Backend Engineering Intern *New York, NY*

· Constructed the distributed, parallel query processing engine for CockroachDB (*git.io/vMKFV*)
· Implemented distributed sort algorithms, parallel aggregations for data analytics workloads
· Added distributed row de-duplication and highly performant n-way parallel SQL joins
· Re-wrote the SQL join implementation to use in-memory hash tables for a speedup of a factor

Shopify Jan – Apr, 2016
Production Engineering Intern *Ottawa, ON*

· Designed a dynamic, flexible continuous integration system with auto-scaling build agents
· Built infrastructure to support dynamic workload distribution across distributed agents
· Optimized orchestration system to handle 1,000+ builds per day saving 60,000 USD per month

Solink May – Sept, 2015
Software Engineering Intern *Kanata, ON*

· Decomposed single monolith platform into inter-connected, resilient microservices

Research

uWaterloo Computer Aided Reasoning Lab Sept – Dec, 2015
Researcher *Waterloo, ON*

· Researched under Prof. Vijay Ganesh on Boolean SAT solvers, optimizing search strategies
· Independently discovered parallelization algorithm by clustering related SAT clauses

Projects

CFilter *git.io/v6GkV*

· Cuckoo Filter paper implementation, a probabilistic data structure for set-membership queries
· Trended on the front page of HackerNews with 14,000+ page views and 500+ stars on Github

Gossip *git.io/vMrE9*

· Embeddable distributed gossip networks based on the SWIM paper, using gRPC and protobufs
· Eventual consistency model, resilient to partial failures through dissemination protocols

Education

University of Waterloo 2014 – 2019 *(expected)*
Honours Bachelor of Applied Science in Computer Engineering GPA 3.7

· Class Representative, President's Scholarship, Distributed Systems Reading Group
· Selected Coursework: Compilers, Operating Systems, Algorithms
